

Nanonets

Investor Pitch Deck

The world's most frictionless document communication platform.

Making documents interoperable across businesses.

It's 2022 and we're still putting up with paper, incompatible formats, messy record keeping and reconciliation.

The Problem

Current document based processes are slow, expensive and erroneous

1000

Documents to be processed by a business per day

40

Documents that can be processed manually per day

>\$14

Cost of manual data entry per document

\$53.50

Cost of correcting a manually digitised document

\$1.5 Trillion

In business losses globally

The Solution

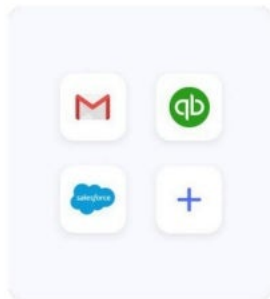

Automating complex workflows with Artificial Intelligence

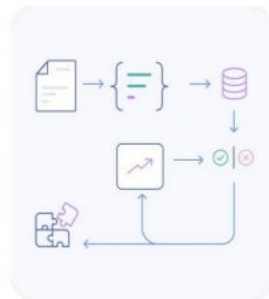

**Any data as
an API**

**Learnable
decision engines**

**Unified, cross
platform**

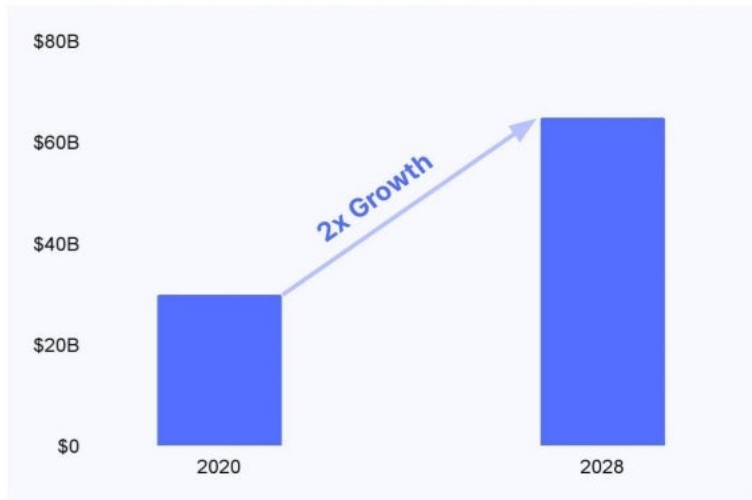

**Actionable
insights**

Parameters in Largest Deep Learning Model

Overall Market

Industry Growth Projections

The global industrial automation software market revenue is projected to increase from USD 33.54 billion in 2020 to **USD 60.83 billion in 2028**.

Intelligent Document Processing market is expected to grow at a **CAGR of 36.8%** during the forecast period.

Why Machine Learning

	Nanonets	Traditional OCR	AP Only Tools
End-to-end Workflows	✓	✗	✗
IT Friendly	✓	Needs developer to set up	Needs Training
Learnable Decision Engines	✓	✗	Rule Based
Learns from examples	✓	No Learning	Rule Based
Self learning	✓	✗	✗
Process documents in any format from day 0	✓	✗	✗

No. Documents $\propto$ Accuracy, 1/Effort
