

paddle

SaaS is exploding.
**And SaaS businesses
are born global.**

But achieving
global scale is hard.

The underlying
complexity is huge.

Across multiple
markets. Globally.

Tax & Compliance

Localised Checkout

Fraud Management

Cross-border Payments

Subscription Billing & Management

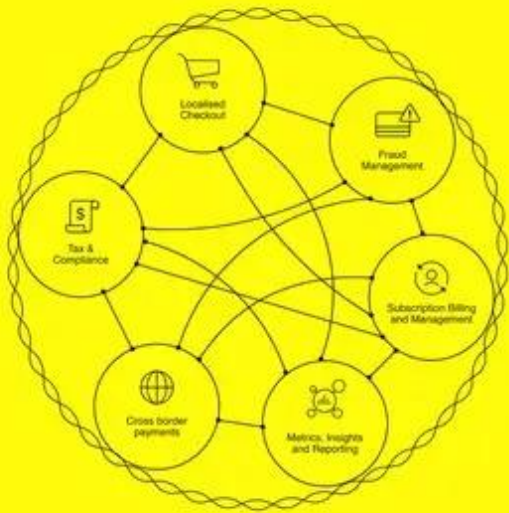

Metrics, Insights & Reporting

Existing approaches to handling the problem are a vast range of point solutions not built for SaaS, all duct taped together.

Companies cannot respond to new regulation or new opportunities fast enough.

Paddle has built a single unified platform, just for SaaS.

Checkout, payment, subscription management & compliance all in one place.

We remove the friction so companies can scale fast.

Paddle Today:

Revenue infrastructure for SaaS companies.

Our TAM is huge,
and today we only
focus on a small
portion of it.

Software market is opening up which greatly increases our TAM.

- ❖ App Stores are opening up due to litigation (Epic v Apple + Antitrust).
- ❖ Paddle has the only true drop-in replacement for In-app Purchase. Developed, ready to launch.
- ❖ Current waitlist of ~1,500 developers, ~\$1BN of GMV.
- ❖ Working with Epic, US lobby (CAF) and the UK's CMA to open App Store to competition.
- ❖ Addressable TAM of ~\$30BN once live.

Leadership Team

Christian Owens

Founder & CEO

Founded Paddle in 2012

Run a successful company building & selling software

Andre Vella

CTO

Joined Paddle in 2020

CTPO heycar

Chrys Chrysanthou

Kindred Capital

A scenic view of a coastline framed by dark tree branches. The view shows a blue body of water meeting a green, hilly shoreline under a clear blue sky. The foreground is dominated by dark, silhouetted tree branches that create a natural frame around the landscape.

Thank you.
