EXPLODING MARKET

1M printers sold by 2017
47% YOY Growth

A close-up photograph of a 3D printer in operation. The printer's red and black nozzle assembly is positioned above a yellow, reflective print bed. A purple, helical-shaped object is being printed and stands on the bed. Various colored cables (red, orange, purple) are visible, connected to the printer's mechanism. The background is slightly blurred, showing more of the printer's structure.
