

Making motion into magic

Problem

True digital presence requires natural human motion.

But injecting life into digital humans and working with motion data is notoriously hard.

Across industries, there's an immediate need for easy and accessible ways to capture, edit, and analyze motion.

Solution: A one-stop-shop for digital movement.

An AI-infused, collaborative,
easily accessible, vertically
integrated motion platform.

From empowering creators..

Creator economy

Equipping every creator with the power of animation

..to the backbone of all digital movement

Opportunity in
creator economy:

A new content creator is born each second

SoMe/Metaverse platforms
are fueling explosive growth
in internet creators, streaming
giants accelerate demand
for high-end content.

Primary focus

Exponential growth: Emerging creators (internet creators)

Young generations are
producing content at
a speed, quality, and
pace that's completely
unprecedented

Secondary focus

Strong growth: Pro studio animation

The fierce competition in
streaming has driven
investments in high-end
content to an all-time high

Digital human motion
is a key need in
multiple high-growth
markets

Commercial Flywheel

A collaborative, easy-to-use, input/output agnostic and vertically integrated platform

💡 All tools support users in creating, sharing and trading motion assets

We move on the world's most powerful dataset of human motion

With the largest fleet of mocap systems in the market, we collect motion data that exponentially improves our ability to distill digital movement through machine learning.

Company background

Products

- Hardware: Full performance capture product line (7 patents)
- Software: Cloud-based software suite for editing, analysis and generating motion data
- Machine learning: The world's largest collection of motion data, exponentially increased through hardware use, continuously enforcing all tools

Future vision

- Core vision: Become the backbone of all digital human motion
- Metaverse opportunity: Rokoko is the missing link to create "virtual presence" in the Metaverse, i.e. natural and untethered human motion
- New verticals: Understanding and capturing human motion is a challenge across verticals. Rokoko is positioned to become the go-to Infrastructure. Development projects already ongoing in health, sports, enterprise, robotics
