

TRYM™

CANNABIS FARM MANAGEMENT SOFTWARE

Investor Presentation

CEO & Co-founder
Matt Mayberry: matt@trym.io

Problem

The US legal cannabis market is projected to reach \$31B by 2024, yet many growers still manage their daily operations with pen and paper

Meet Trym,
cultivation software
custom built for
cannabis

Trym provides growers with tools to meet challenges across their entire operation

Compliance Reporting

Team Management

Predicted Yields

Environmental Monitoring

Batch Management

Harvest Analytics

How Trym Works

"Trym puts organizing and running my farm into the palm of my hand. It allows me to structure my days and weeks ahead of time and consolidates all of my grow data into one place. Customer support is superb!"

DANIEL TUTOR

Supernatural Gardens / Owner & Operator

Environmental Data

Trym integrates with your environmental control system to link data to the plants in each zone.

Trym Grow App

Track tasks, plants, and environmental conditions for every room in your operation.

Trym Explore App

Schedule tasks for your entire season weeks or months ahead, create & track batches, and report compliance data to Metrc.

Precedence for Exit

Dupont Acquires Farm Management Software Granular for \$300M

2 million acres* of row crops under management

\$1.3B annualized crop value under management

2 million sq. ft. of cannabis facilities under management

\$ 1B annualized crop value under management

Cannabis crop value far exceeds conventional crops

As a result, Trym currently is managing commodity crop value comparable to that of leading agricultural farm management software systems

Annualized Row Crop Value = 2M acres * \$652 corn revenue per acre * 1 harvest per year
Annualized Row Crop Value = (1214 sq. ft. * 40g per sq. ft. / 454 grams) * \$1440 per pound * 8 harvests per year
*Granular's reported coverage of type of acquisition
Crop value source: USDA ERS 2019 corn estimates published October 2019
Wholesale cannabis value source: Cannabis BusinessMag January 2020

Thank You
