This presentation and all information contained herein (collectively, this “Presentation”) is solely for information purposes to provide recipients information about Yuga Labs, Inc. (f/k/a Yuga Labs LLC) (“Yuga”). This Presentation is provided “as is”, does not purport to be all-inclusive and none of Yuga, its affiliates, or any of their respective directors, officers, managers, members, employees, agents, or other representative, makes any representation, warranty, declaration, guarantee, certification or promise, in each case whether express, implied or otherwise, as to the accuracy, completeness, or reliability, of this Presentation.

This Presentation does not constitute any offer to sell, a solicitation of an offer to buy, or a recommendation to purchase or offer to purchase any security of Yuga. You are not permitted to construe this Presentation, including the contents herein, as legal, tax, accounting or investment analysis, recommendations or advice. You should consult your own counsel and tax and financial advisors as to all matters concerning Yuga.

BY ACCEPTING THIS PRESENTATION, EACH RECIPIENT REPRESENTS AND WARRANTS TO YUGA THAT IT IS NOT RELYING UPON THE INFORMATION CONTAINED HEREIN TO MAKE ANY DECISION, INCLUDING ANY INVESTMENT DECISION.

This Presentation is the property of Yuga and no right in or license to any contents of this Presentation is granted to any recipient. This Presentation constitutes confidential information of Yuga and is provided to each recipient on the condition it each such recipient agrees that it will hold this Presentation herein in strict confidence, and shall not directly or indirectly reproduce, disclose, forward, disseminate, or distribute this Presentation in whole or in part without the prior written consent of Yuga, which may be withheld, conditioned or delayed in its sole discretion. Recipients who do not desire further information agree to return this Presentation promptly to Yuga.

FORWARD LOOKING STATEMENTS

Certain statements in this Presentation may be considered forward-looking statements. Forward-looking statements generally relate to future events, including but not limited to, Yuga’s future financial or operating performance. Solely by way of example, projections of future revenue, expenses and other metrics are forward-looking statements. In some cases, forward-looking statements may be identified by terminology such as “may”, “should”, “expect”, “intend”, “will”, “estimate”, “anticipate”, “believe”, “predict”, “potential”, “project”, “continue”, or the negatives of these terms or variations of them, or similar terminology. Such forward-looking statements are subject to numerous known, unknown, and unknowable risks, uncertainties, and other factors, any or all of which that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. All forward-looking statements in this Presentation, whether expressly or implicitly, are based upon estimates, assumptions, analysis and interpretations that, while considered reasonable by Yuga and its management, are inherently uncertain. This Presentation is not, and shall not be relied upon as, a representation, warrant, declaration, guarantee, certification, or promise, as to the past or the future performance of Yuga. This Presentation contains preliminary information that is subject to change, and which may be superseded, in whole or in part, by information contained in materials that may be distributed at a later date; provided, Yuga does not have any obligation to update this Presentation.

COMPANY BAYC FUTURE & ROADMAP FINANCIALS

COMPANY

Yuga Labs is a web3 company exploring big ideas in identity, ownership, utility, & interoperability to push the crypto and NFT space forward.

Our founders

Gordon Goner

Founder and Co-President
([Twitter](#))

Gargamel

Founder and Co-President

We marry expertise in media and technology with consumer-focused brand building at scale.

Guy Oseary

Minority partner at Yuga Labs

Industry pioneering media mogul and the founder of Maverick, a talent management firm whose clients include U2 and Madonna. Co-founder of Sound Ventures alongside Ashton Kutcher.

Nicole Muniz (V Strange)

Chief Executive Officer, Minority partner

Track record in scaling brands from seed through major growth. 10+ years in industry and category agnostic consumer marketing. Worked with Google, Facebook, Oscar, Nike, HBO, and Spotify to name a few.

Jasmin Shoemaker (Soda)

Chief Operating Officer

15+ yrs in tech using strategic analysis and laser insight to build, enhance, and scale operations at startups and companies like Apple & Facebook. Empathetic leader, with an impressive history of eliminating threats to platforms.

Patrick Ehrlund (Pez)

Chief Creative Officer, Minority Partner

15+ years in brand storytelling, from pushing the boundaries of interactive experiences in early web to grand visions for today's consumer technology. Worked with brands such as Electronic Arts, Kanye West, Google, Square, and HBO.

Overview of the Yuga team

46 employees and counting coming from Google, Oculus, Facebook, Twitter, 72andSunny, B-Reel, Acne, Apple, (the) Dune Game, Monolith Gaming, WB Gaming, Microsoft, Nike, and Amex.

46% of our employees are **female**.

Our **diverse Staff** comes from all backgrounds and walks of life.

Our **Community Managers** actually come from the BAYC community.

We're bridging the gap
between culture and web3.

BAYC is just the beginning. We
are building the next frontier...

Expanding IP (New + Acquired)

New Utility

New Product Development

Breaking Metaverse Boundaries

New Verticals (Gaming, Streetwear, Events,
and more)

BORED APE YACHT CLUB

Bored Ape Yacht Club is the premier Blue Chip NFT.

Utility was the key

Each BAYC owner got access to the club. On day 1 this meant a members-only accessible digital experience (drawing digital dicks in the bathroom) but we were also the first to publish a roadmap creating hype around what was to come.

Surpassed 100ETH floor

BAYC: Floor price = 117 ETH, Number of unique holders = 6.3K

MAYC: Floor price = 24.4 ETH, Number of unique holders = 11.6K

BAKC: Floor Price: 9.9 ETH, Number of unique holders = 5.4K

Aping into a bigger community experience

Our mission to be more than a JPEG was clear from Day 1. Selling out in 7 days and 9 hours. People not only wanted the sick art, they wanted the bigger members-only experience - merch, games, and events.

Backed by culture (media & celebs)

List of well-known ape holders include: Serena Williams, Justin Bieber, Mark Cuban, Steph Curry, Shaq, Lil Baby, Timbaland, Jimmy Fallon, Paris Hilton, Future, Post Malone, Diplo, DJ Khaled, Snoop Dogg, Eminem, Steve Aoki, Meek Mill, Ja Rule, Neymar, Travis Barker, Gwyneth Paltrow, Ben Simmons, Logan Paul, The Chainsmokers, Dez Bryant, Von Miller, Rolling Stones, and more.

Ownership empowered the community

The success of the BAYC brand can directly traced back to this pivotal decision. By granting commercial ownership rights to our members, we not only changed the game but we empowered them to push the brand even further. Collectively we make make a marketing team of thousands.

Backed by industry (crypto + NFT leaders)

List of well-known crypto/NFT celebs include: Ivan Soto-Wright, Pranksy, JRNY Crypto, Alexis Ohanian, Faze Banks, Deepak, Gary Vee, Taylor Gerring, Garry Tan, Roham, and more.

How Did the Bored Ape Yacht Club Get So Popular?

It has nothing to do with art. It's a gimmick, plain and simple.

PHOTOGRAPH BY HANCOCK/ALAMY

Apes have catapulted into mainstream consciousness.

TheMonarch 🍀🍀
@themonarch00

You know you should be bullish on @BoredApeYC when all you see is people helping each other out with this Treasure Hunt despite CLEARLY being in competition with one another.

Happy to be a part of that kind of community.

WHAT WE'RE BUILDING
IS BIGGER THAN
BORED APES

OpenSea, the largest NFT marketplace to date, saw a **600x** increase in transaction volume in 2021.

For each day so far in 2022, OS has broken **\$150 million** in trading volume.

OS currently surpasses 1 million active user wallets.

The BAYC collections alone
account for approximately **10%**
of the volume on OpenSea.

It's clear that the NFT audience is growing exponentially and BAYC is at the center.

There are new projects popping up everyday, but there's only one Bored Ape Yacht Club.

The FOMO is real. For every BAYC member there are hundreds dying to gain access.

We want to build something that expands the universe of the BAYC, but also invites the larger NFT community (and those priced out of BAYC membership) to join.

FUTURE & ROADMAP

Microsoft and the Metaverse

Why are so many major companies investing in this new digital world — and what is it, anyway?

<https://www.cnbc.com> › 2022/01/16 › walmart-is-quietl... ⋮

Walmart is quietly preparing to enter the metaverse - CNBC

Jan 16, 2022 — Walmart appears to be venturing into the metaverse with plans to create its own cryptocurrency and collection of non-fungible tokens, or NFTs.

Inside Gucci and Roblox's new virtual world

Gucci is expanding its presence on Roblox, a metaverse and gaming platform, with a virtual two-week art installation, *Vogue Business* can exclusively reveal. It's building brand awareness among some very young customers.

There are no ifs, ands, or buts about it.
We are all in a race to the metaverse.

Edward Snowden ✓
@Snowden

...

congratulations on inventing LinkedIn: The Game
good luck with your stock price

Facebook (now Meta) is banking trillions on it.

But does anyone else feel like the existing metaverses are underwhelming?

The idea of a metaverse isn't new. And there's almost no question that humanity is moving towards an immersive virtual experience.

If we aren't already living
in a simulation that is.

It's just that metaverses in fiction are exciting and dynamic. And the ones we can explore today are...not.

SO WHAT'S MISSING?

IN ESSENCE...

a purpose, real stakes,
shared goals, connections
and decisions that matter.
A story to care about and
to participate in.

The Metaverse Land Rush Is an Illusion

The “real estate of the future” is plagued by buggy software, empty servers, and huge opportunities for abuse.

Let's face it. A virtual social hub isn't enough to hold attention long term.

OUR VISION

Today's metaverses are trying to make something new, but they're really just creating something boring.

VS

Each one is a siloed production that doesn't feel connected to the Web3 personas that we've been building.

And isn't the whole point of a metaverse to have one virtual world that all of humanity is tied to? If everyone is building their own how does that work? (our thoughts on this later..)

The thing is, we already have examples of people gathering online, forming lifelong friendships, and kicking ass.

And all of those examples are in gaming.

That's why we're *not*
building a metaverse.

We're building *the*
interoperable gaming
metaverse - a MetaRGP.

IF WE BUILD IT
THEY WILL COME

Why will *our* metaverse succeed?

The answer is simply that
we have a story & brand that
current culture is obsessed with.

What we've created combines:
storytelling, pop culture, taste,
and fun in just the right amounts.

WHAT WE'RE BUILDING
IS BIGGER THAN
BORED APES

THE QUESTION IS:

How do we create something
that unifies *everyone*?

By creating something truly
decentralized and interoperable.

A metaverse that makes all
other metaverses obsolete.

A brand new gaming experience where money is real, you actually own your land and resources, everyone can bring their own NFT character, and anyone can create in-game assets.

Play as whatever Web3 persona you want.

And we'll build an SDK that allows collections, creators, and developers to build for any community who wants it.

Creating an infinite ecosystem entirely available in our in-game marketplace. We're seeing it as an in-game app store.

SDK's for all the things that matter to our users today and a platform for them to collaborate on what's next.

- **Create all new characters**

- Either from existing NFT collections or completely new IP

- **Skins, digital clothing, gear and more for in game characters (ownership and interoperability included)**

- **Game Development**

- Rich games. (We're in talks with Animoca to build a racing game, NWay is building a PvP arena, what will others build?)

- MiniGames. (Wordscapes is one of the top games on AppStore today – we'll have an arcade of minigames for ppl to build for.)

Games accounted for 71% of total app revenue in 2020.

iOS generated \$47.6 billion revenue in 2020, while Google Play made \$31.9 billion.

Fortnite Annual Revenue

Year	Revenue
2018	\$5.4 billion
2019	\$3.7 billion
2020	\$5.1 billion

Annual App Revenues

Year	App revenue
2016	\$43.5 billion
2017	\$58.1 billion
2018	\$71.3 billion
2019	\$89 billion
2020	\$111 billion

Why is the NFT community the best audience for this metaverse? They're already living Web3 and experimenting with alternative currencies.

IT'S NOT ONLY A GAME,
IT'S A WHOLE NEW ECONOMY

Speaking of currencies...
introducing APECoin.

APECoin will be the currency of our metaverse. One unifying coin with which to power our app store like marketplace.

We'll also encourage trading and bartering, and can introduce a soft currency to allow for more accessible spending.

Using APECoin will unify the currency
between reality and real gameplay.

THE CATALYST

The Big Bang created a massive explosion of energy, from which a great number of celestial creatures were born, shooting out in every direction.

These celestials were unique and special, powered by the energy of creation itself. They could even cross through other dimensions as they continually expanded and danced through the universe.

One by one, these celestials have exhausted the energy they were born with. As each lays down to rest, they transform into the stars, planets, and galaxies we see today.

The problem? There aren't many celestials left. And without their creational energy the universe as we know it will collapse.

Not all hope is lost. Should the right creature evolve, each celestial carries the blueprints and instructions on how to jumpstart the universe into its next evolution. Luckily for us, one race of celestials still remain - the Kodas.

Alas, a miracle! The Kodas have discovered intelligent life on earth, and have been monitoring our evolution, biding their time and waiting for the right moment to reveal themselves...

The Kodas have used their last remaining cosmic energy to birth one final microverse into our dimension. They have pulled the perfect candidates - (Apes at the end of capitalism and other interoperable NFTs) through our metaverse and dumped us into a strange new land.

GAME DETAILS

The MetaRPG will launch with a land sale. These land plots will correspond to real land in our game.

The Land Drops

- **The MetaRPG will be made up of 200k land plots total; all launched through Animoca**
- **Genesis drop will be 100k plots**
 - 30% of that will go to BAYC/MAYC, leaving ~70k for public sale (and then another 100k in follow up drop)
 - The conservative estimate for the land price is 1 ETH each plot = ~\$200M in primary sales for the genesis drop alone.
- **The initial land sale will include teases to future paired NFTs such as in-game characters, resources, artifacts and more.**
 - Once minted as paired NFTs, token holders will be able to trade & sell these as well (triggering secondary sales for token beyond the primary land)

Each plot of land will have the possibility of containing: natural resources, rare artifacts, and if you are lucky, a Koda.

Work in progress concept art

Shadow Land #5609

Owner • [Pez.eth](#)

DESCRIPTION

Shadowland is a land discovered by lorem ipsum dolor sit amet, consectetur adipiscing elit. Viverra in diam ac id at amet.

SEDIMENT

Slime Sediment

Exclusive to MAYC Owners

Description:

Produces toxic slime and emits radioactivity.

CURRENT KODA
