

The background of the image is a close-up, slightly blurred photograph of a green printed circuit board (PCB). It features intricate silver-colored traces, various electronic components like resistors and capacitors, and a large, square integrated circuit (chip) in the center. The lighting creates a soft glow, highlighting the textures and colors of the board.

A fashion show runway scene. A large, realistic-looking elephant model is walking on a white runway. The elephant is facing left, with its trunk slightly raised. On the left side of the runway, several models' legs and feet in various styles of shoes are visible. On the right side, a crowd of spectators, including children and adults, are watching the show. The background is dark with several spotlights illuminating the runway. The text "Powered by Omate" is overlaid in white at the top.
