ENTREPRENEURS TRUST OUR TEAM

Founders we back enjoy working with us and trust us in their entrepreneurial journey

Our biggest network effect is the founders we partner. They are our evangelists. **Founders NPS is a core performance metric** we scrutinize and focus on to constantly improve.

Taimon Marco
Co-Founder & CEO @ HQPro

HQPro has raised over \$100MM from some of the best investors. But back in 2019, when we were looking for our seed financing, no one would talk to us. No one, except the Contrarian team. They took the time to study what we were doing and were the first VC to say "Yes". It was \$250K, which at the time meant the world to us. Since then, they always helped with a call, with a link, with insight and most important, with being good, supportive investors that understood the needs of the company - and not just their needs as investors. We love you.

David Trainavicius
Co-founder & CEO @ PVcase

Our continued partnership with Contrarian Ventures has been crucial to PVcase's sustained success. Their experience in scaling climate tech startups made them the ideal firm to work with in our early stages and Series A. It's a breath of fresh air to work with like-minded investors that are as dedicated to fighting climate change as we are.

Tommy Ricketts
Co-Founder & CEO @ BioZeta Carbon

Contrarian are great to work with. We share the same ambition of scaling climate solutions to accelerate Net Zero transition. They helped us sharpen our thinking about our product, and the wider market, as well as supporting us through events and expertise. We're very happy with the work we've done together.

Simon Daniel
Founder @ Morai

Contrarian has an excellent energy technology network, always provided great advice, and was able to advise and assist on access to the wider investment community. I also see them as a great conduit to other European early stage ventures for partnership or investment opportunities.

Adam Fudskowski
Founder and Exec Chair @ Switchee

Contrarian have always been my go-to investor for support and advice on fundraising and growth. They really know their stuff and have always provided the best quality guidance and advice around.

Thibault Castagne
Co-Founder & CEO @ Vianova

Since the seed round, Contrarian Ventures has been instrumental in setting us up with the right connections for Vianova. A patient, active and mission-driven investor that all founders should seek.

Mina Nada
Co-Founder & CEO @ Zoomi

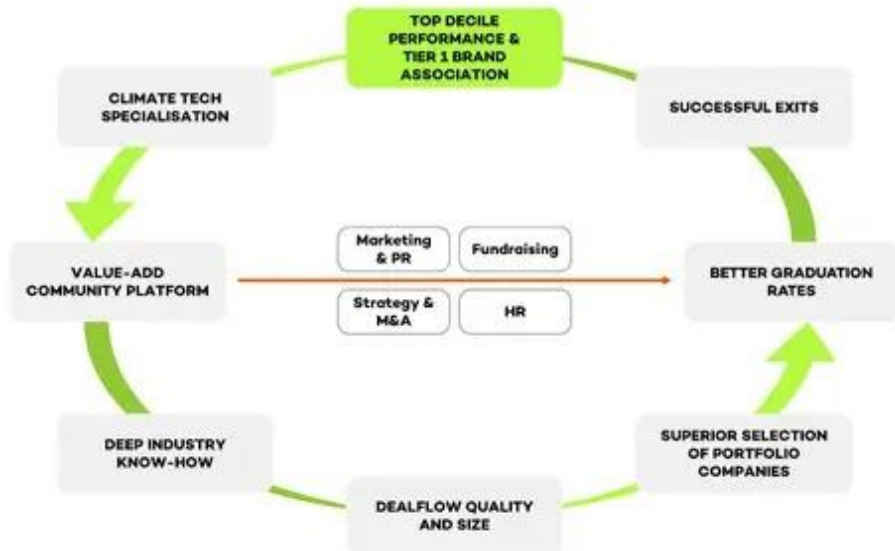

Working with the Contrarian Ventures team has been incredible. Their mission to solve the net zero challenge through technology aligned with our values and they have been instrumental in our growth - from seed to series B.

Andreas Slettvoll
CEO @ OHOOSE

The Contrarian team have added real value from day 1. They are extremely responsive and always have great insights and advice. In addition, they are really helpful in both accelerating and maturing, in terms of actionable advice, capital round readiness, and challenging status quo. +++

UNIQUE SELLING PROPOSITION FLYWHEEL

WHY PARTNER WITH US?

WHY PARTNER WITH CONTRARIAN VENTURES

- **Leading VC brand and community in Europe**
- Contrarian Ventures is in the early days of building the firm that **defines this new Climate tech category in Europe**
- **Investing across Europe and Israel, well-equipped geographies** with the talents for innovation
- **Fund I is already proven with early successes, and we are doubling down on Fund II**
- **We offer an opportunity** to get exposure in an emerging category that is showing outstanding financial returns and making a tangible impact
- We are looking for **long-term partners** that share our vision to support entrepreneurs and make a tangible impact toward net-zero goals
- **Join us in our journey towards net-zero!**

**LET'S NOT FORGET.
THERE IS NO
PLANET B.**
